EDUCATION

The LNM Institute Of Information Technology

Bachelor of Technology - *Computer and Communication Technology*

Jaipur, India

Aug 2023 - May 2027

DPS Panipat Refinery

Class-XII (Science Stream) - Percentage: **92.6%**

Panipat, India

2023

DPS Panipat Refinery

Class-X - Percentage: **88.8%**

Panipat, India

2021

EXPERIENCE

App Development Intern

Subcidys

May 2026 – Present

Remote

- Spearheaded an **offline-first Flutter Fintech application**, leveraging **Riverpod** for reactive state management and decoupled dependency injection to drive seamless, **local-first financial data synchronization**.
- Crafted adaptive, cross-platform interfaces featuring responsive **Glassmorphic layouts**, bespoke gradient data visualizations, and platform-specific typography scaling to **optimize complex financial reporting**.
- Optimized complex nested routing topologies using **GoRouter**, resolving intricate **Z-index overlay bottlenecks through Root Navigator** delegations and dynamic safe-area shell paddings.

Florinaa | Demo

Freelance Project

Jun 2026 – Jul 2026

- Maximized user engagement and **lead generation by 40%** designing a high-conversion e-commerce frontend with cinematic parallax scrolling, dynamic product filtering, and an automated catalogue download system
- Streamlined business operations and secured user data by developing a Node.js admin dashboard with robust **RESTful APIs, automated CSV exports, brute-force login protection, and httpOnly JWT authentication**.
- Optimized deployment speed and system scalability by architecting a zero-dependency backend with JSON persistence, ensuring a highly adaptable foundation for seamless **database migrations**.

DhatuScan

Freelance Project

Jul 2026 – Present

- Developed a full-stack cross-platform mobile application using **Flutter (iOS & Android) and Node.js/Express REST API backend, integrating PostgreSQL via Prisma ORM** for persistent user data and health assessment storage.
- Implemented **end-to-end user authentication and onboarding flow** using **Google Sign-In OAuth 2.0**, with dynamic profile management, mandatory field validation, and real-time state synchronization using the **Provider pattern**.
- Built a **personalized Ayurvedic health assessment engine** with multi-step questionnaires, algorithmic Dhatu imbalance scoring, and **tailored recommendation generation**, deployed on a live backend tunnel (**ngrok**) for physical device testing.

Teaching Assistant

The LNM Institute of Information Technology

Jan 2025 - Apr 2025

- Mentored **80+ undergraduate students** in ISL (Introduction to Scripting Language) concepts including **NumPy, Pandas, and Scikit-learn**
- Provided hands-on support during lab sessions, assisting students in **debugging code and applying theoretical concepts**

PROJECTS

CodeCollab | *Node.js, Express, React, Socket.IO, MongoDB, WebRTC* | GitHub

Aug 2025 – Nov 2025

- Engineered a **real-time collaborative coding platform** supporting multi-user editing with **WebRTC** and **Socket.IO**, reducing synchronization latency by **40%**
- Integrated **Monaco Editor** to provide a VS Code-like editing experience with syntax highlighting and intelligent code handling
- Designed **room-based architecture** enabling multi-user file sharing and synchronized editor states
- Implemented **real-time communication features** including chat, shared whiteboard, and **WebRTC**-based video calls

Insurance Claim Decision Assistant | *Python, FastAPI, LLM, ChromaDB* | GitHub

Jan 2026 – Mar 2026

- Built a full-stack LLM-powered claim evaluation system using Groq's LLaMA 3.3 70B for **NLP parameter extraction**, applying **5 rule-based decision engines** to auto-generate APPROVED/REJECTED verdicts, reducing **manual claim processing time by 40%**
- Implemented **RAG pipeline** using **ChromaDB** and **HuggingFace** embeddings for **semantic PDF chunking**, enabling context-aware policy **Q&A** with source attribution

LNMIIT Multi-Department Portal | *React, Vite, JavaScript, CSS3* | GitHub

Jan 2026 – May 2026

- Built a centralized, responsive academic portal using **React** and **Vite** to streamline information access and administrative workflows across multiple university departments
- Developed a scalable, **component-based** frontend for dynamic rendering of departmental data, ensuring seamless navigation and cross-device compatibility
- Optimized frontend performance and reduced load times by leveraging Vite's optimized build process and modern React rendering patterns

AssetFlow | *Node.js, Express, React, JWT, PostgreSQL, Prisma* | GitHub | Demo

Jun 2026 – July 2026

- Developed a **full-stack Enterprise Asset Management System** using React (Vite), Node.js, Express, and PostgreSQL, deployed on Vercel and Render with a custom domain, supporting end-to-end asset lifecycle workflows across multi-tenant organizations.
- Integrated a **Role-Based Access Control (RBAC) engine** with 5 hierarchical roles (Super Admin, Admin, Asset Manager, Department Head, Employee), **multi-tenant data isolation**, department-level scoping, and a dynamic per-user permission override system backed by **Prisma ORM**.
- Built **core enterprise modules** including real-time Resource Booking with conflict prevention, Asset Allocation & Transfer Requests, Maintenance Ticket Tracking, and Audit Cycle management with **per-department scoping for compliance**.
- Implemented secure **REST API architecture with JWT authentication**, centralized error handling, **input validation middleware**, Prisma database migrations, and **environment-based configuration**, following industry-standard software engineering practices.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, Python, SQL, HTML5, CSS3, Dart

Frameworks/Libraries: React, Flutter, Node.js, Express.js, FastAPI, Socket.IO, TailwindCSS, LangChain, Pandas, NumPy

Developer Tools: Git, GitHub, Docker, Vercel, VS Code, Google Cloud Platform, Jira, BitBucket, Android Studio, Xcode

Databases: MongoDB, MySQL, PostgreSQL, Prisma ORM

Concepts: Data Structures & Algorithms, REST APIs, WebSockets, OOP, System Design Fundamentals

ACHIEVEMENTS

- Solved **300+ problems** on **LeetCode** with a maximum contest rating of **1654**
- Achieved **96.2 percentile** in **JEE Mains** among **1.1M+ candidates**, ranking in the **top 3.8%**
- School topper in **Physics and Mathematics** in **Class XII**
